Special Report

A *Journal* reader who received about a dozen short videos I sent from Santa Chiara last week via WhatsApp converted them to low-resolution files which I could send via email so I could share them with all the *Journal* readers.

Over the next few days I will share three or four videos a day that will make SCCC come alive for you in ways words and photos cannot. The videos range in length from 15 seconds to about a minute, so it will not take much to view each day's offerings.

Enjoy the sights and sounds of the Santa Chiara Children's Center in Port-au-Prince, Haiti...those in these first three clips you will only see and hear kids.
